

## Paintainer

**Paintainer is the perfect plastic packaging for paint - leak free and suited for tinting machines. An elegant and straight sided design ensures a premium brand display.**

### Key benefits

- Premium visual brand presentation
- Cost competitive
- Available in all colours, also metallic
- Low noise level on filling lines
- Light weight ensures easy handling and transportation
- 100% liquid tight – also during tinting
- Can be opened and closed without use of any tool
- Photographic IML decoration on all sizes
- Perfectly suited for Pan-European branding

### Excellent functionality and design

When looking for a container made of plastic for paint, consider the sleek Paintainer with a straight sided design. It offers superb options for outstanding decoration.

### Paint the easy way

This brilliant container is especially suitable for paint and surface coatings and meets all requirements for this type of content. Among the great qualities of Paintainer is that the container is very easy to stack, handle and transport. The internal design is smooth and there is no risk of bulging.

### A multiple award winner

Paintainer has been recognised for its outstanding qualities multiple times: It holds a Scanstar from Scandinavia's most distinguished packaging competition and the related important international distinction, namely a WorldStar. Another seal of excellence was achieved when Paintainer was honoured with the prestigious iF award.

### User-friendly packaging

Conveniently, end users can open and close the container without the use of any tool and Paintainer makes a reassuring click-sound when closing it. A ready-mounted plastic handle - available in colours - provides for great comfort. Another practical advantage is that the ring does not get dirty during emptying and pouring thanks to a high rim.

### High speed at the filling line

In the filling line Paintainer generally fits the existing equipment without much alteration and the filling speed means efficiency for the supply chain. Paintainer is available in a range of 9 sizes from 400 ml to 5.3 litres.

Volume under lid (ml)	Dim. (mm)	Base	Lids					Optional
