

CombiPac® – CombiRound®

CombiPac® and CombiRound® are two differently shaped packs for the food industry based on the same clever principle: combining the best properties of cardboard with the ones of plastic.

Key benefits

- Lightweight packaging
- Grease resistant
- Excellent printing quality
- Embossing and braille available
- Lids in clear foil or in any colour
- Light barrier provided by the cardboard
- Fabulous space option for branding messages
- Optional separation of cardboard and plastic
- Print on the reverse side of the cardboard
- One-colour bottom-print

Combining cardboard with plastic

A unique combination of plastic and cardboard gives you a packaging with the best of both worlds in one and the same packaging: The outer part is made of cardboard, providing for light barrier protection and ensuring a lightweight pack. The inner part consists of a thermoformed plastic sheet, protecting the edible content and making the pack grease resistant. The combination of cardboard and plastic maximises the strengths of each component and enables a reduction in the use of fossil-based materials of up to 50 per cent.

Maximise the CombiRound® pack's space for branding and select the one-colour bottom-print option for vital information about your product such as barcodes, expiry date and the like.

Various types of cardboard and lids

Select the type of cardboard that suits you best: virgin cardboard, recycled or FSC cardboard (Forrest Stewardship Council). As an option, you can have the cup made with a 100 per cent peelable cardboard, making it easy for the end users to separate the two types of material for recycling. Embossing and braille are other available features. Lids may be in clear foil or in any colour of your liking and they come pre-printed, with carton inserts or with dry offset printing.

CombiPac® - great for yellow fats

The CombiPac® solution is ideal for butter, yellow fats and dairy products. CombiPac® combines unique barrier properties with an exclusive look. The excellent printing quality on the cardboard gives an outstanding on-shelf appeal and when you choose a rectangular shape you will have five large panels for your brand message or other pertinent information that you would like to share with your customers. You can also have your own customised version made for even better brand recognition.

CombiRound® is a versatile cup

The CombiRound® pot is suitable for any type of dairy product, confectionery, snacks, nuts and more. Thanks to its qualities it was honoured with a Scanstar. If you choose the on-the-go lid with a separate compartment you can please your customers with various add-ons; for example a spoon, crunchy topping, jam or promotional material. The pot is also available with transparent foil and a window. Make the most of the great design opportunities and let CombiRound® distinguish your product and brand on the retail shelves.

CombiPac® - CombiRound®
