

Hot and Cold Cups

High-quality reusable cups for hot and cold drinks and soups.

Key Benefits

- Washable and reusable
- Stackable
- Made of widely recyclable PP*
- Rib structure for safe grip with a premium look and feel
- Bespoke IML print
- Option of incorporating RFID-chip or QR code

Smart and reusable with premium look and feel

The Berry Cup Range is an assortment of reusable plastic cups designed for the needs of the restaurant business and outlets for hot and cold take-away drinks, soups and similar liquid products.

These cups are exceptionally durable and offer superior branding options. Their unique rib structure makes both the hot and cold cups visually appealing and will add a touch of elegance to your business. The hot cups feature heat insulated material while the ribs ensure additional heat insulation as well as a secure grip.

You can choose In-Mould Labeling (IML) decoration to enhance your brand recognition. You can even incorporate a RFID-chip or QR code to engage with your customers and enhance their experience.

Sturdy, stackable and washable

All cups in the range are sturdy, stackable and washable. They have an inside stacking rim or ribs with smooth curves for improved cleaning. The cups are 1.2 mm thick which ensures that they are robust and have a reusable feel. These cups retain a premium quality feel even after they have been reused several times. Naturally, the cups are designed to be stackable, ensuring they occupy minimal space.

They are made from PP only, which is a high-quality plastic material that is safe for food contact and easy to recycle*.

The cups come in various sizes to suit different serving needs while maintaining a consistent design. For hot drinks and soups the available sizes are 320 ml to fit 0,2 l and 515 ml to fit 0,4 l, while the sizes for cold drinks are 425 ml. to fit 0,3 l, 545 ml to fit 0,4 l and 675 ml to fit 0,5 l.

Innovation and manufacturing excellence

Berry Superfos designs, develops, and manufactures innovative plastic packaging solutions – with sustainability in mind. Nearly all Berry Superfos factories hold ISO 9001, BRC and ISCC PLUS certificates documenting that we meet internationally recognized packaging standards and best practice.

Your business can take advantage of our manufacturing excellence and vast experience in mono-material packaging that is both widely recyclable* and can be produced initially with recycled materials.

* Recyclability will depend on the availability of recycling infrastructure in the region of disposal.
