

# UniPak

UniPak comes in an abundance of shapes and sizes; the range is probably the most extensive one on the European market. It is a classic and very flexible solution for a broad variety of applications.

## Key Benefits

- Protective collar
- Withstands hot filling up to 95°C and blast freezing
- Available in round, rectangular, oval and square
- Broad range of standard sizes
- Same lid fits several volumes
- Excellent decoration options with In-Mould Labelling
- Liquid tight, snap-on lid
- Visible deterrent to tampering is standard
- Insert option

## A popular and cost-efficient solution

Whether you are looking for a square, rectangular, round or oval shape for your packaging you will most likely find what you are after in our UniPak range. It keeps your costs down: several pots match each lid diameter so you only need to stock one versatile type of lid for a range of sizes. With UniPak, there is no point in reinventing the wheel: Your flexible packaging solution is ready at hand.

## Try out a combination

Use UniPak to combine two items in one packaging with an insert. In this way you can sell exciting and practical combinations of two products all in one packaging and made from one single material. It could be succulent fruit with crunchy toppings or screws and plugs - UniPak is multipurpose.

## Boost your logistics

UniPak is cleverly designed and allows you to optimise the use of every single pallet and thereby reduces warehouse costs. At the filling line, UniPak withstands both hot filling and blast freezing; during transport, a protective collar protects the UniPak lid and improves the stability of the pots.

## Enlarged family with SuperLift®

If your customers want your product in a very broad range of sizes, you can combine the UniPak series with its sister series SuperLift® which offers bigger sizes. The design of the two is very similar allowing you to apply what may be Europe's biggest packaging family: from 120 ml to 22 litres.

## In-Mould Labelling brings out the best of your brand

The display surface gives you premium options to present your brand in a razor sharp, eye-catching way – with a family image for a variety of sizes and shapes. Vivid colour combinations, text and photographic images - the possibilities are close to endless on the lid and on the sides. For some sizes, even the bottom of the pot can be a platform for your communication with your consumers. Make the best of your brand and product with In-Mould Labelling.
