

Reusable Tableware Range

Versatile reusable tableware for the food service industry.

Key Benefits

- Washable and reusable
- Stackable
- Effortless handling
- Made of widely recyclable PP*
- Bespoke IML print
- Option of incorporating RFID chip, barcode, Digimarc, or QR code

Enhancing your customer experience

The Berry Superfos Reusable Tableware Range comprises a versatile assortment of reusable bowls and lids meticulously crafted to cater for the specific needs of the food service industry. This range empowers restaurants, cafes, and other food outlets to minimise packaging waste and reduce virgin material use for packaging while enhancing their presentation and enjoyment of meals and other food.

Exceptional durability and premium aesthetics

The reusable tableware range is built to last, offering durability, convenience, and a premium aesthetic that elevates your brand image. Transparent lids enable captivating presentation of complete meals, fresh salads, delectable snacks, irresistible desserts, and more. Through In-Mould Labelling, both bowls and lids become handy canvases for branding, allowing the distinct visual identity of each food provider to shine through.

New possibilities for service efficiency

The stackable bowls and lids are also designed for seamless on-site operations within the food service industry. They are easy to handle, enabling waitstaff to efficiently serve multiple portions simultaneously.

Each bowl can incorporate a QR code, barcode, Digimarc, or RFID chip with a unique code, facilitating seamless implementation of return deposit systems, refill systems, wash cycle tracking, and efficient inventory management for the reusable bowls and lids. An RFID chip can also be embedded into each lid.

Restaurant customers can conveniently take leftover food home or order takeaway meals, with the option to return both the bowl and lid to the point of purchase for reuse, promoting sustainability and reducing waste.

* Recyclability will depend on the availability of recycling infrastructure in the region of disposal.

Reusable Tableware Range

Product Line	Product No.	Dim. (mm)	Volume (ml)	Decoration	Venting Holes

Lid	6974	195 x 167	985	-	No
Lid	6975	195 x 167	-	-	Yes

Multiple solutions with smart design

While comprising only two types of bowls and lids, the Reusable Tableware Range is highly versatile. The high bowls with low lids and low bowls with high lids can be used interchangeably, with the bowl or lid placed at the top or bottom, and they can also double as plates.

This smart design provides the food service industry with multiple solutions, making the Reusable Tableware Range a practical and efficient choice for all needs.

Innovation and production excellence

Berry Superfos designs, develops, and produces innovative plastic packaging solutions – with sustainability in mind. Nearly all Berry Superfos factories hold ISO 9001, BRC and ISCC PLUS certificates documenting that we meet internationally recognised packaging standards and best practice.

Your business can take advantage of our production excellence and vast experience in mono-material packaging that is both widely recyclable* and can be produced initially with recycled materials.

Please consult the technical data sheet of the specific product sizes for detailed information
