

SuperLock®

SuperLock® is a multi-award winning packaging that doubles or even triples shelf life for convenience food. Oxygen transmission is almost non-existent thanks to the unique combination of a membrane seal and oxygen barrier on all surfaces.

Key Benefits

- Shelf life up to 24 months
- Extremely low oxygen transmission rates
- Suitable for hot filling and autoclaving in the process line
- Click-on screw lid featuring perfect re-closure and re-use
- Fantastic decoration options with In-Mould Labelling anywhere
- Excellent clarity and transparency for see-through area
- Single material ensuring easy recycling
- Microwave, dishwasher and freezer safe

Longer shelf life

The SuperLock® pot allows for a shelf life of up to 24 months for a broad range of convenience products for products such as cabbage, dips, sauces, sour cream and nuts. In SuperLock®, convenience products can stay on shelf twice as long - or even three times longer - than in reference packaging. This makes SuperLock® a pioneering solution in plastic packaging.

Barrier protection on all surfaces

The key quality of SuperLock® derives from the extremely low oxygen transmission rate. It has been achieved through targeted innovative efforts combining barrier protection on all surfaces with a membrane seal. The brilliant result is long shelf life documented through laboratory tests and premium customer experience.

Decorations anywhere

Not only barrier protection is available for the entire pot. SuperLock® also offers outstanding graphic quality decorations with In-Mould Labelling on all surfaces. This makes it an excellent platform for branding in all the colours of the rainbow together with razor-sharp text, illustration and images – simply set your creativity free. Also, you could decide to leave some space non-decorated and create a see-through area because the plastic of SuperLock® provides excellent transparency and clarity.

Great design

The thoroughly prepared round design also sets the pot apart. The click-on screw lid is very user friendly and offers perfect re-closure and re-use. There is an acoustic indication when the lid is closed correctly adding to the user friendliness and product safety. This premium packaging comes in sizes from 65 ml to 535 ml and in three different diameters.

Multi-award winning packaging

SuperLock® is a new generation of award winning packaging, based on outstanding innovation and design. It has been honoured with many international seals of quality, among them Cifa Award, Starpack Award, Scanstar, WorldStar and iF Award.
