

CombiPac®

CombiPac® are square or rectangular shaped packs for the food industry based on the same clever principle: combining the best properties of paperboard with the ones of plastic.

Key Benefits

- Lightweight packaging
- Grease resistant
- Excellent printing quality
- Embossing and braille available
- Lids in clear foil or in any colour
- Light barrier provided by the paperboard
- Fabulous space option for branding messages
- Optional separation of paperboard and plastic
- Print on the reverse side of the paperboard
- One-colour bottom-print

Combining paperboard with plastic

A unique combination of plastic and paperboard gives you a packaging with the best of both worlds in one and the same packaging: The outer part is made of paperboard, providing for light barrier protection and ensuring a lightweight pack. The inner part consists of a thermoformed plastic sheet, protecting the edible content and making the pack grease resistant. The combination of paperboard and plastic maximises the strengths of each component and enables a reduction in the use of fossil-based materials of up to 50 per cent.

CombiPac® - great for yellow fats

The CombiPac® solution is ideal for butter, yellow fats and dairy products. CombiPac® combines unique barrier properties with an exclusive look. The excellent printing quality on the paperboard gives an outstanding on-shelf appeal and when you choose a rectangular shape you will have five large panels for your brand message or other pertinent information that you would like to share with your customers. You can also have your own customised version made for even better brand recognition.

Various types of paperboard and lids

Select the type of paperboard that suits you best: virgin paperboard, recycled or FSC® paperboard (Forest Stewardship Council®). As an option, you can have the cup made with a 100 per cent peelable paperboard, making it easy for the end users to separate the two types of material for recycling. Embossing and braille are other available features. Lids may be in clear foil or in any colour of your liking and they come pre-printed, with carton inserts or with dry offset printing.

CombiPac®

Volume under lid (ml)	Dim. (mm)	Base	Lids		Material
			Membrane/ On-the-go options	Decoration	
CombiPac® Square					
190	96,5 x 96,5 x 30	41-0190	Carton insert/Offset	All sides/reverse	PS/PET-Paperboard
