

Thor

Thor is the brand name of a sturdy range of round containers made from polypropylene. This convenient and liquid-tight packaging solution is as strong as its name indicates and particularly suitable for food, soups included.

Key Benefits

- Round and robust
- Made of recyclable material
- Liquid tight
- Tamper evidence is standard
- Fine curve on collar for easy opening
- Decoration with self-adhesive labelling
- Suitable for hot filling and blast chilling

Liquid tight and strong

The Thor plastic packaging solution is robust and ideal for soups of any kind, but equally suitable for a broad variety of other types of food from biscuits to seafood. These containers are suitable for hot filling and blast chilling and the range offers you effective product protection including tamper evidence as standard.

In addition, there are multiple options for re-using the container at home for household storage. Just like the god Thor in Norse mythology, the Thor pots are strong – and, quite possibly, just the solution you are looking for!

Tamper evidence and a curve on the collar

Thor is a versatile packaging solution of a highly consistent quality. The tamper evidence lids reassure end-users of the top hygiene standard of your food products. There is a fine curve on the collar which also allows for easy opening.

On shelf and in warehouses, the Thor containers offer excellent stackability, plus the advantage of high quality decoration and easy handling for the consumer. They are safe for use in dish washers, freezers and microwave ovens.

Decoration options and sizes

For virtually all sizes, you can decorate your packaging with self-adhesive labelling PE on the pot, while some are also apt for decoration with 6-colour printing. The Thor containers are supplied in more than 15 different volumes under lid and come in several diameters.

Thor

Volume under lid (ml)	Dim. (mm)	Base	Lid	Decoration	TE
Thor Round					
220	Ø99	220 99a	99a	Self-adhesive labelling PE	Yes
