

Practical containers for disinfectant wipes

Innovative range for hygiene products

If you help customers in the business of health care, food processing, dairy, hotels, restaurants, catering or similar, you will know that top-level hygiene is paramount. Practical containers with dispenser lids are spot-on for every day professional use of disinfectant wipes – wet or dry – in these as well as other industries. Berry Superfos has developed a range of containers for wipes. When the cap in the lid is sealed, the wet wipes are actually in an airtight container, preventing evaporation. This means that your wet wipes stay moist, fresh and useful for longer.

Dispenser lids for easy use of your hygienic wipes

The dispenser lid has a resealable cap with convenient functionality. Berry Superfos offers you an array of lids matching several of our ready-to-use pail series. This means that for the packaging body, you can choose any design, diameter or shape (round or square) – there is always a perfect dispenser lid in our range. These lid types are at your disposal: snap-on, flex-off, peel-off and pry-off. For increased cost efficiency, please note that one type of lid can be used for various pail volumes. Choose between containers with a plastic handle on collar and containers with a hanging plastic handle.

Colours

The regular colour of container and lid is white, however, available in other colours from our colour range. The cap comes in white, dark blue or red. The pail can be decorated with In-Mould Labelling or offset depending on the base you choose.
