

Innovative plastic packaging

Tamper Evidence

Same lid fits several volumes

Immaculate graphics with In-Mold Labelling

Expertise, new machines and robotics

Take RPC Superfos US on board for your next injection molded plastic packaging project. Benefit from our advice, expertise and our new European molding machines, robotics and molds. We offer you efficient production footprints thanks to dual- and tri-injection units. Each machine can mold containers and lids at the same time.

Top level hygiene and product quality

We fulfill top level requirements for hygiene and high product quality and are certified to comply with BRC Global Standard in the High Hygiene Category. Approved virgin material and high safety are other core competences which give you durable packaging solutions for food and non-food throughout the entire value chain.

Some examples of our ready-to-use packaging solutions:
Sizes span 8 oz to 1.3 US Gallons

Easy to empty

Innovative edge

Easy to open and re-close

Bespoke packaging – the way you want it

If you prefer a specific pack, RPC Superfos US will take great pleasure in being your trusted packaging partner for developing the right bespoke solution for your product. For the highest levels of on-shelf impact and consumer appeal, we collaborate with the RPC Superfos Innovation Center in Europe and together, we can create your own bespoke packaging in only a few months.

Injection Molding

Sustainability

Innovation

Sustainability matters

Our plastic packaging solutions are made from recyclable material, are lightweight and contribute to less food waste. Every day, we strive to protect the environment – and our packaging can help you to honor your commitments on sustainability.
